

Single Use Solutions

Liquidyne specializes in designing and implementing cGMP single use solutions to the Biotech and Pharmaceutical Industries with an emphasis on "Performance with Value"

ImPULSE Mixer™
Sampling
Tubing Manifolds
Transfer Assemblies

Gamma Sterilized Single-Use Solutions for storage, mixing and process solutions in volumes in 50—5,000L.

- Media/buffer prep
- Cell culture & purification
- Fill & finish

Filters:
Disc
Capsule
Cartridge
Element
Integrity Testing

World leader in innovative membrane technologies, including PES, PVDF, Nitrocellulose manufacturing.

Micro/Ultra Filtration:
TFF Cassettes
Sius™
NovaSet™

World's first truly single-use Micro and Ultra filtration cassettes which offer 50 to 80% savings compared to traditional multiple use cassettes and fit all competitive cassette holders from 100cm to full scale production.

Liquidyne is partnered with the leading manufacturers of single use products and systems.

Coupled with our Class 7 Clean Room we provide the solutions & expertise you have come to expect from Liquidyne.

Single Use Solutions

Diaphragm Pump:
4-Piston,
Eccentric Shaft

Unique low shear, higher pressure pump with flow rates to 330 LPM. Designed for all biotech processes. Especially suitable for cell harvest, UF/DF, and purification applications.

All pump sizes available with polypropylene pump heads for single use and non metallic applications.

Liquidyne is a leading provider of innovative Single Use Solutions (SUS).

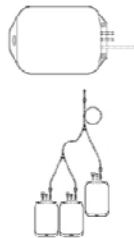

Our experienced consultants:

- Provide knowledgeable technical support
- Economical solutions
- Efficiently move your project forward

We offer on-site filter evaluation, product demonstrations and seminars.
